Compliance is not only necessary for business success; it can help ensure organizational resilience. From internal procedures and external regulatory requirements to industry or international standards and codes of conduct, you need a robust approach. One that helps you keep customers happy, enables your employees to perform better, protects your organization and helps you achieve your goals.

## That's where Entropy™ Software– Compliance Management can help.

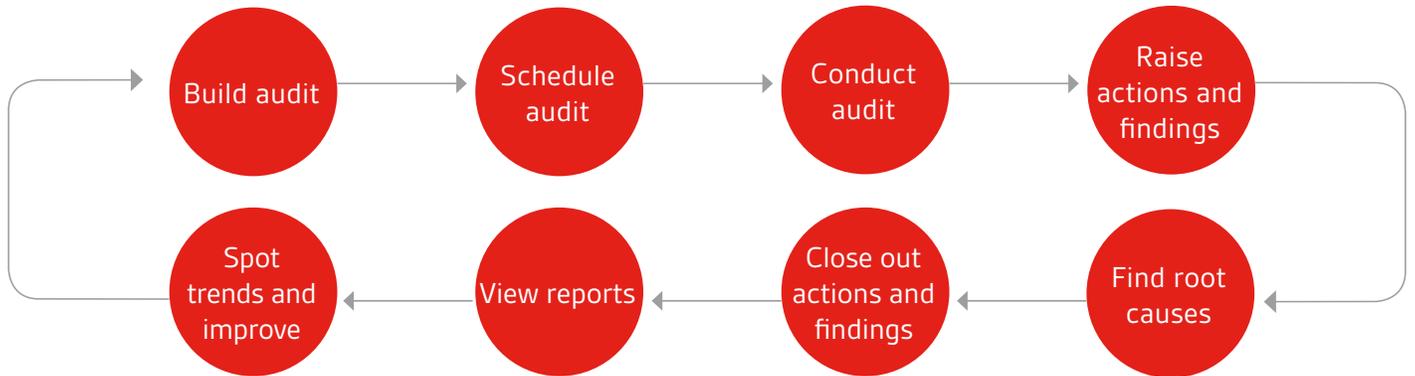

Compliance Management is an integrated audit tool that helps you to identify, monitor and control associated compliance risks and operational activities. It provides you a consistent approach to manage and streamline processes across standards, legislation or internal procedures that are relevant to your organization – so you can be more effective and have confidence in your compliance program.

With user friendly features, dashboards and reports you'll be able to:

- **schedule**, plan and conduct audits
- **identify** non-conformances and observations
- **easily track**, close and/or escalate related actions
- **get** real-time reports on audit and compliance
- **obtain** a complete view of the compliance landscape

Whether you manage compliance by location, business unit or in one central location, Entropy Software can give you visibility of your performance and help your operations run smoothly.

## Core functions

## What are the benefits of Compliance Management?

- **Automates** tasks in your compliance workflows, ensuring timely close-out of actions
- **Streamlines** your processes, helping you be more proactive and improve your efficiency
- **Reduces** operational and administration time, costs and risk
- **Increases** visibility of critical compliance information across your organization through user-friendly dashboards and reports
- **Improves** productivity and accountability of management teams and auditors
- **Supports** timely implementation of a new management system, or integration of multiple management systems/ processes
- **Empowers** you to identify trends and compare performance
- **Delivers** analytics on non-conformities, providing actionable perspective to prevent costly results
- **Improves** the collection, capture and reporting of audit data
- **Simplifies** audit management, giving you an instant view of your organizations compliance

**Take control –use Compliance Management notifications and report updates to make sure you meet your reporting deadlines and avoid any related penalties.**

**Entropy™ Software** is a powerful business management solution that reduces the cost and effort needed to proactively manage risk, improve performance, accelerate compliance and help your business grow sustainably.

Composed of three core modules, it provides pre-configured templates and content across leading management system criteria and external regulatory requirements so you can effectively manage compliance, risk, incidents and related documents. A centralized system, you can access, track and share relevant information across your entire organization.

Used globally, by companies of all sizes, Entropy Software enables you to streamline critical processes that drive continual improvement across all areas of the business.
